Water Main Replacement Group Job 924

Project Background

Water Group Job 924 is a city-mandated project aimed at replacing aged and deteriorating water mains nearing the end of their service life with new, more reliable materials that are resistant to deterioration, breaks and blockages.

Project Overview

Slated for the Mid-City-Eastern community of Council District 4, the project will focus on replacing 21,555 lineal feet of water mains. Curb ramp installation and street resurfacing are also a part of this project

The City recognizes this project will impact those living and working in the community. Precautions will be taken to minimize noise, debris, traffic and parking disruptions.

While traffic flow will be allowed during construction, residents may see traffic control measures, including detours. At the end of each work day, the streets will re-open to normal traffic conditions.

Construction will occur in seven (7) phases. Residents and businesses will receive notification about work taking place on their street via door hangers no fewer than five (5) days prior to construction.

Construction Schedule

The anticipated construction schedule for this project is March 2012 through June 2013. Construction work will occur weekdays between 8:30 a.m. and 3:30 p.m.

Cost

The total estimated cost of this project is \$5,596,305.
